

# SPOTIFY PARTY

DJ-ING DEMOCRATISED

\\TODO:TEAM NAME

STACKHACK V:  
8-BIT HACK

MARCH 3, 2019

# WHAT IS IT:

- Collaborate curation of what is listened to.
- Users can host a party, or join a pre-existing party using the room code.
- Users can suggest, upvote, and downvote on the songs to be played from the hosts Spotify account.
- Manages the playlist of songs, updating it as new songs are added or rise to the top.

# TECHNOLOGIES USED:

## Languages:

- Python
- Javascript

## Front End:

- jQuery
- Bootstrap

## Back End:

- Flask
- Spotipy - Python Wrapper for the Spotify API

# LIVE DEMO(HOPEFULLY)

Note that this slide was written before we actually got it working
